

“The most hygienic hand dryer available on the market today”

Raymond Martin  
MD British Toilet Assoc.

Make your washroom less of a health hazard

## Air and surfaces sanitised and protected

- **Destroys bacteria and viruses in the air and on surfaces**
- **Eliminates bad odours**
- **Destroys mould and fungi**
- **Provides fresh clean air, without masking agents**
- **Sanitises all exposed surfaces 24hours a day, 7 days a week**
- **Hygienically protects staff, visitors and other users**
- **Provides high-speed and efficient hand drying**

**Improving air quality in washrooms will clear odours and improve the healthcare of your staff and visitors. The Sterillo and Sterillo UNO eliminate unpleasant washroom odours and controls harmful bacteria and viruses both in the air and on all exposed surfaces 24 hours a day, 365 days a year.**

Odours and infections are created by bacteria, viruses, mould, fungi and volatile organic compounds in the air and on surfaces.

Sterillo Hand Dryers aid washrooms which accumulate high levels of harmful bacteria and viruses. With every flush, toilets and urinals force faecal micro-organisms into the air settling on washroom surfaces. Poor ventilation, shared facilities and people who do not wash their hands all add to the hygiene problem.

Regular cleaning, disinfecting and use of masking agents cannot control the spread of micro-organisms. In eight hours, a single bacteria cell can multiply to over 8 million, meaning odours prevail and health risks increase. Destroys Room Bacteria Eliminates Bad Odour High-Speed & Efficient.

This is where Sterillo and Sterillo UNO helps.

# The Sterillo air sanitisation process

Improving air quality in washrooms will clear odours and improve the healthcare of your staff and visitors. The Sterillo hand dryer eliminates unpleasant washroom odours and controls harmful bacteria and viruses both in the air and on all exposed surfaces 24 hours a day, 365 days a year. Suitable for all washrooms small or large, each unit offers a coverage of up to 30m<sup>2</sup>, providing clean, fresh, sanitised air. With minimal maintenance and low consumption, they provide a green solution which improves hygiene and environment for all users.

The advanced technology of the Sterillo thermal allows the control of bacteria, viruses and moulds both in the air and on surfaces more efficiently than ever before. All of this is achieved without fans and with very low energy consumption. The custom designed Thermal convection system ensures that contaminated air processed through the unit achieves optimum dwell time in the purifying chamber. As the processed air leaves the unit then in itself it becomes an efficient cleaning agent targeting pathogens both in the air and on surfaces.

The Sterillo and the Sterillo UNO are the perfect pair when it comes to simply destroying airborne germs in any area.

This diagram illustrates the inner workings of a Sterillo hand drying and Sterillo UNO unit.

The unit takes in contaminated air and purifies it using our unique system. This happens continuously, not just whilst the dryer is activated.

The dual ultraviolet light operates at the peak UVC wavelength, creating germicidal irradiation, hydroxyl radicals, superoxide ions, plasma quatro and optional ozone.

Specialist thermal convection smoothly moves air through the unit, combined with the internal diffuser plates the speed and distribution of air over the dual lamp is controlled to increase exposure to the UV light providing maximum pathogen destruction both internally and around the washroom environment.
