

Installation method

1 Draw the position of mounting holes

- According to the installation position, hold the mounting plate in place with one hand where the machine will be installed. Use your other hand to draw the positions of mounting holes in pencil or draw them directly according to the size.

2 Drill holes

- In accordance with the position of the drawn holes, drill four holes 6 mm in diameter and press the expansion pipes into the four holes.

3 Fix the mounting plate

- Align the installation holes of the installation panel with the expansion pipes and fix them with self-threading cross screws.

4 Install the machine

- The mounting plate has protruding hooks for inserting into the slots on the machine and allow it to hang from the mounting plate. Align the slots with the hooks on the mounting plate and push the machine down until the anti-theft screw holes on the machine and mounting plate are aligned

5 Fix anti-theft screws

- Screw anti-theft bolts into the bolt holes to fix the machine to the mounting plate. Install the air intake grill and make sure the grill is locked.

Test run

Steps	Confirm information	Check & Notice
1 Shake the machine gently	The machine is installed firmly without shaking or noise	Shaking and noise will occur when the machine isn't installed firmly
2 Confirm the power output with a voltage meter	The voltage is at the required level	Misusing the voltage is likely to cause personal injury or machine burning out
3 Switch on the power	Close power supply	Power supply must match the requirement for the machine. Please check the power when the indicator light is not bright.
4 Dry your hands under the machine	High speed air blow	Confirm whether your hands are at the correct distance from the sensors
5 Turn on the perfume dispenser switch	The machine emits fragrance	Press the setting button to check the three perfume setting modes

Perfume mode setting

Once the machine is powered on, the hand dryer is on standby and the perfume dispenser stays closed. Press the button on the right side of display screen to turn on the perfume dispenser. As soon as the dispenser starts working, it shows "12h" on the screen, which is the factory default mode. You can choose one of three working modes including "12h", "auto" and "24h" by pressing the settings button that is on the left side of display.

1) "12h": with this mode, the perfume dispenser works 12 hours each day. During the 12 hours, the perfume dispenser works in cycles of 10 minutes active and pausing for 10 minutes. (small circle). Then closed for the remaining 12 hours of the day (big circle).

2) "auto": with this mode, the perfume dispenser turns on and off automatically according to light changes in the environment (including natural light and electrical lights) During activated times, the perfume dispenser also works for 10 minutes and, pausing for 10 minutes in a cycle as mentioned above.

3) "24h": with this mode, the perfume dispenser works 24 hours each day. Also working for 10 minutes and pausing for 10 minutes in cycles as mentioned above.

Daily use and maintenance

External maintenance

- Clean the shell with a soft dry cloth or dry towel. Use neutral detergent. Do NOT use organic solvents, acid or alkali toilet cleaner, cleaning brush etc.

- ❗ Otherwise, it will damage the surface finish or cause discoloration.
- ❗ Please don't apply any alcohol to the surface. If using a chemical cloth, please follow the instructions.

Regularly check the air inlets to ensure that they are free from dust and debris. Simply wiping the inlets with a soft cloth should be sufficient to remove dust and debris, however, removing the cover and cleaning the filter is recommended at least every six months.

- If the air inlets get clogged, further cleaning or a filter change might be required.
- If required for high usage environments, a regular filter change is advisable. Contact the Handy Dryers Helpline for more information.
